Chapter 1

GALAHAD C package fit

1.1 Introduction

1.1.1 Purpose

Fit polynomials to function and derivative data.

Currently, only the control and inform parameters are exposed; these are provided and used by other GALAHAD packages with C interfaces.

1.1.2 Authors

N. I. M. Gould and D. P. Robinson, STFC-Rutherford Appleton Laboratory, England.

C interface, additionally J. Fowkes, STFC-Rutherford Appleton Laboratory.

Julia interface, additionally A. Montoison and D. Orban, Polytechnique Montréal.

1.1.3 Originally released

March 2010, C interface January 2022.

Chapter 2

File Index

2.1 File List

Here is a list of all files with brief descriptions:

| | |
|---|---|
| galahad_fit.h | 5 |
|---|---|

Chapter 3

File Documentation

3.1 galahad_fit.h File Reference

```
#include <stdbool.h>
#include <stdint.h>
#include "galahad_precision.h"
#include "galahad_cfunctions.h"
```

Data Structures

- struct [fit_control_type](#)
- struct [fit_inform_type](#)

Functions

- void [fit_initialize](#) (void **data, struct [fit_control_type](#) *control, int *status)
- void [fit_information](#) (void **data, struct [fit_inform_type](#) *inform, int *status)
- void [fit_terminate](#) (void **data, struct [fit_control_type](#) *control, struct [fit_inform_type](#) *inform)

3.1.1 Data Structure Documentation

3.1.1.1 struct fit_control_type

control derived type as a C struct

Data Fields

| | | |
|------|------------------------|---|
| bool | f_indexing | use C or Fortran sparse matrix indexing |
| int | error | error and warning diagnostics occur on stream error |
| int | out | general output occurs on stream out |
| int | print_level | the level of output required is specified by print_level |
| bool | space_critical | if space_critical is true, every effort will be made to use as little space as possible. This may result in longer computation times |
| bool | deallocate_error_fatal | if deallocate_error_fatal is true, any array/pointer deallocation error will terminate execution. Otherwise, computation will continue |
| char | prefix[31] | all output lines will be prefixed by .prefix(2:LEN(TRIM(.prefix))-1) where .prefix contains the required string enclosed in quotes, e.g. "string" or 'string' |

3.1.1.2 struct fit_inform_type

inform derived type as a C struct

Data Fields

| | | |
|------|---------------|---|
| int | status | return status. Possible values are: <ul style="list-style-type: none"> • 0 Normal termination with the required fit. • -1. An allocation error occurred. A message indicating the offending array is written on unit control.error, and the returned allocation status and a string containing the name of the offending array are held in inform.alloc_status and inform.bad_alloc respectively. • -2. A deallocation error occurred. A message indicating the offending array is written on unit control.error and the returned allocation status and a string containing the name of the offending array are held in inform.alloc_status and inform.bad_alloc respectively. • -3. the restriction $n \geq 1$ has been violated. |
| int | alloc_status | the status of the last attempted allocation/deallocation. |
| char | bad_alloc[81] | the name of the array for which an allocation/deallocation error occurred. |

3.1.2 Function Documentation

3.1.2.1 fit_initialize()

```
void fit_initialize (
    void ** data,
    struct fit_control_type * control,
    int * status )
```

Set default control values and initialize private data

Parameters

| | | |
|---------|----------------|--|
| in, out | <i>data</i> | holds private internal data |
| out | <i>control</i> | is a struct containing control information (see fit_control_type) |
| out | <i>status</i> | is a scalar variable of type int, that gives the exit status from the package. Possible values are (currently): <ul style="list-style-type: none"> • 0. The initialization was succesful. |

3.1.2.2 fit_information()

```
void fit_information (
```

```

void ** data,
struct fit_inform_type * inform,
int * status )

```

Provides output information

Parameters

| | | |
|---------|---------------|---|
| in, out | <i>data</i> | holds private internal data |
| out | <i>inform</i> | is a struct containing output information (see fit_inform_type) |
| out | <i>status</i> | is a scalar variable of type int, that gives the exit status from the package. Possible values are (currently): <ul style="list-style-type: none"> • 0. The values were recorded succesfully |

3.1.2.3 fit_terminate()

```

void fit_terminate (
    void ** data,
    struct fit_control_type * control,
    struct fit_inform_type * inform )

```

Deallocate all internal private storage

Parameters

| | | |
|---------|----------------|--|
| in, out | <i>data</i> | holds private internal data |
| out | <i>control</i> | is a struct containing control information (see fit_control_type) |
| out | <i>inform</i> | is a struct containing output information (see fit_inform_type) |
